

**[ For waterproof Floors ]**

## EXTRA WEAR & STAIN RESISTANCE

While many coatings currently available on Rigid products help with one of these features, Stampede Ultra brings the possibility for Rigid to perform better on all fronts.

Stampede Ultra outperforms all other common competitive flooring finishes in the 4 areas that really matter when it comes to coatings.

### Micro-scratch resistance EN 16094

	Regular Coating	Stampede Ultra	
<b>Pressure Applied (N)</b>	16	32	<b>Up to 10x Better</b>
<b>Qty of Revolutions</b>	160	1000	

*Taken after 1000 revolutions at 32N*

### Micro-scratch resistance EN 16094

	Regular Coating	Stampede Ultra Tech	
<b>Pressure Applied (N)</b>	16	32	<b>Up to 10x Better</b>
<b>Nbr of Revolutions</b>	160	1000	

## WEAR

Micro scratch resistance is tested using a pre-defined type of sandpaper, measuring the pressure and number of revolutions and seeing the degree to which the surface is affected in terms of gloss change and in terms of visible micro scratches left on the surface.

Using the same method, we tested to what extend we could push the test until we visibly could start seeing tiny scratches on a floor with Stampede Ultra tech and tested both Stampede Ultra and a regular coating.
